

PROJECT PROFILE

PROJECT: Fire Protection - Wooden Surfaces

LOCATION: United Kingdom

THE PROBLEM

This application was for a new restaurant. The restaurant was designed as a Swiss style chalet and the interior was virtually all built using pine wood.

A coating system was required that would enhance the appearance of the wood and provide the required fire protection.

THE SOLUTION

Pyro-Tech C.S. was chosen as it met these requirements.

Pyro-Tech C.S. is a clear, water based fire protection coating specifically developed for wooden surfaces. It is easy to apply by brush, roller or spray; it is suitable for use on any wooden surface and has been approved to BS476 Part 7 class 1 surface spread of flame.
