

PROJECT PROFILE

Company Name: **Manila Water Company – Filter 2 East Wing**
Project Name: **Waterproofing of Roof deck Area using THORTEX Product-UK**
Contractor's Name: **Impex Engineering and Industrial Supply**
Product Applied: **Thortex Poly-Tech CSM and Thortex Poly-Tech BP Primer**

THE PROBLEM

The substance of this roof deck is concrete with asphalt on top of it. It was the first solution to the problem of leak. But the existing solution didn't last that long. It was starting to flake away from the surface that's why it continues to leak when the heavy rain comes.

THE SOLUTION

All loose flakes were removes from the surface by mechanical abrasion.

The Thortex Poly-Tech BP Primer was then applied to the bare concrete.

After the primer, Thortex Chopped Strand Mat spread through out the surface follow by the two coats of Thortex Poly-Tech CSM. These products were chosen because of their remarkably performance.
