

## PROJECT PROFILE

Company Name: **National Power Corporation-Calaca**  
Project Name: **Roof Refurbishment using THORTEX Product-UK**  
Contractor's Name: **Impex Engineering and Industrial Supply**  
Product Applied: **Thortex Poly-Tech CSM and Thortex Poly-Tech BP Primer**

### THE PROBLEM

Due to the effects of the environment and time, the external concrete roof deck was in need of repair. Molds and cracks are already visible. The client required a high performance system, which would offer long-term protection and be resistant to the elements.

### THE SOLUTION

The roof deck surfaces were clean and brushed free of any loose materials, the cracks were injected with Thortex Floor-Tech SP Injectable Grade and then prime with Thortex Poly-Tech BP Primer.

Above the primer, Thortex Chopped Strand Mat was spread and then two coats of Thortex Poly-Tech CSM, our flexible waterproof, were applied.

Thortex Poly-Tech CSM offers outstanding weatherproofing and waterproofing.
