

PROJECT PROFILE

Company Name: **Professional Quest Corporation – Laboratory Building**
Project Name: **Leak Prevention of Roof deck Area using THORTEX Product-UK**
Contractor's Name: **Impex Engineering and Industrial Supply**
Product Applied: **Thortex Poly-Tech CSM and Thortex Poly-Tech BP Primer**

THE PROBLEM

Professional Quest Corporation were having severe problems with water leak attack in their roof decks. Over a period of time the roof decks had also become weak and not durable and were in need of brightening up as these roof decks were used a lot of time by their employee.

THE SOLUTION

Professional Quest Corporation required anti-leak coating system. They also decided to put some stainless steel wire mesh to be more effective. The roof decks were mechanically clean to remove all existing coatings and contamination.

Single coat of Thortex Poly-Tech BP Primer was applied followed by spreading of Thortex Chopped Strand Mat and two-coat of Thortex Poly-Tech CSM. Then the wire mesh was next, afterwards final coat of Thortex Poly-Tech CSM.
