

## PROJECT PROFILE

**PROJECT:** Building Manhattan  
**LOCATION:** USA

### THE PROBLEM

This is a very prestigious Building in Manhattan.

This picture is part of the main Office for Standard and Poor's at 55 Water Street NY.

Thortex has been asked to provide an Anti-Corrosion solution. Nesting Peregrine Falcons are present on site and are appreciated by the Public. For this reason, Thortex was asked to provide a VOC Free Coating solution.

### THE SOLUTION

Thortex designed a technical specification for the project and delivered application expertise .

The Building was cleaned using High-Pressure Jet Water at 3500 psi and Hand tools. Thortex coated the building with a stripe coat and two full coats of Poly-Nox to provide a long-term Anti-Corrosion Protection.

The customer was highly satisfied by the result.
